

Tutortide Website Format

Marketing site uses paths

`tutortide.online/`

`tutortide.online/jinjing`

`tutortide.online/nyokavi`

`tutortide.online/waterpro`

Every marketing page lives together.

SEO is maximized.

The company brand grows.

Then...

Applications use subdomains

`jinjing.tutortide.online`

`nyokavi.tutortide.online`

`waterpro.tutortide.online`

Keep The **website** and the **application** as the different things they are.

For example

tutortide.online/jinjing contains

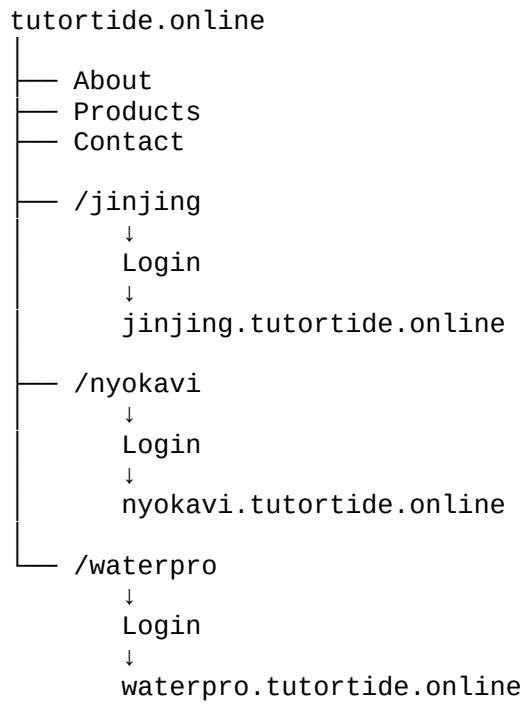

- features
- screenshots
- pricing
- testimonials
- FAQs
- videos
- sign up

Then the "Launch App" or "Login" button goes to `jinjing.tutortide.online`

where the actual application runs.

Designing TutorTide Limited

Follow This:

Each product has:

- its own landing page
- its own documentation
- its own login
- its own dashboard
- its own release cycle

All based on only **one company website**.

How pages will be changed.

#	Current Website	New Use
1	https://tutortide.online/	tutortide.online
2	https://jinjing-landing-page.web.app/	tutortide.online/jinjing
3	https://aistudentcompanion.tutortide.online/	Jinjing.tutortide.online
4	Waterpro PRD	tutortide.online/waterpro
5	MOWP Admins: waterpro-39519.web.app MOWP Members: waterpro-39519-admin.web.ap	waterpro.tutortide.online/
6	https://tundamoto-website.web.app/	tutortide.online/tundamoto
7		tundamoto.tutortide.online/
8	https://massenergy.github.io/nyokavi/	tutortide.online/nyokavi
9	https://waterpro-39519-admin.web.app/login https://waterpro-39519.web.app/	nyokavi.tutortide.online/

Changes for subdomain will be affected in cloudflare.

Changes for webpages will be effected using claude code.
